PROFESSIONAL SUMMARY

- Automation & DevOps Expert:** Expert in Test Automation, CI/CD, and DevOps practices across API, frontend, and backend systems with 8.6 years of relevant experience.
- Program & Agile Leadership:** Agile practitioner with a dual focus on people development and technical delivery excellence. Proven as Scrum Master/Lead driving cross-team coordination, delivery discipline, and program execution.
- Atlassian Ecosystem Specialist:** Experienced in Atlassian backend monitoring, Jira frontend administration, Jira Align, and Jira automation/standardization, ensuring platform stability and process efficiency while identifying and communicating risks and mitigations.
- Modern Technology & GenAI Focus:** Proficient in Python. Skilled in leveraging Generative AI and Agentic AI (Google ADK, FastAPI, Streamlit) for technical delivery, automation, and productivity tool development.
- Strategic Alignment:** Passionate about aligning teams, technology, and strategy to deliver business value, including identifying and implementing process improvements that help teams scale.

CORE SKILLS

Programming	Python, SQL, Windows, PowerShell, Linux Scripting
GenAI & Agentic AI	LLM and AI, Google ADK (Agent Development Kit), GPT, Gemini, FastAPI, Streamlit, Copilot Studio
Cloud	AWS, Azure, Docker, Kubernetes
Program Strategy & Tools	Jira Align, Jira, Planview, Program Strategy & Roadmap Planning
Automation & Testing	Selenium, Robot Framework, Karate Framework, Cucumber (BDD), Apache JMeter, UI Testing, API Testing
Data Warehousing & NoSQL	SAP Hana, BigQuery, MongoDB, Postgres, Neo4j
Governance & Reporting	Reporting & Data Visualization
Leadership	Team Leadership & Management, Budget Oversight & Financial Planning, Coaching & Career Development, Partnership & Stakeholder Management, Executive Presentation

PROFESSIONAL EXPERIENCE

Program Manager, Scrum Lead & Technical SME

Sep 2024 - Present

HCLTech - Dell

- Lead and mentor a team of 5 members, fostering collaboration and alignment with organizational goals while driving programs to successful landing.
- Operate as Scrum Lead/Scrum Master, coordinating with multiple cross-functional teams to manage program execution through design, development, test, and deploy, ensuring delivery discipline.
- Specialize in Atlassian backend monitoring, Jira frontend administration, Jira Align, and Jira Standardization/automation, delivering builds, source control and branch management, while identifying and communicating risks and mitigations to ensure platform stability and process efficiency.

- Maximize team performance and business impact by identifying, developing, and implementing process improvements that help teams scale.
- Designed and implemented a BDD test automation framework using Cucumber, authoring feature files and step definitions to translate business requirements into automated, business-readable test coverage.
- Explored and integrated Generative AI capabilities to enhance automation, testing efficiency, and program management, developing internal applications and Proof-of-Concepts (POCs) for productivity tools using Streamlit, FastAPI, and Milvus, with hands-on exposure to Docker and Kubernetes for containerized deployment of these tools.

Test Automation Lead & Technical SME

Sep 2022 - Sep 2024

UST Global - Dell

- Assumed dual role of Scrum Master and Technical Lead, guiding and leading a team of 5 members, driving project execution through strong ownership and accountability in an Agile/Kanban development environment.
- Spearheaded and executed comprehensive testing efforts across 4 functional areas and over 60 APIs, developing UT and functional test plans for complex applications and executing end-to-end use cases.
- Developed custom testing frameworks using Python for specialized test cases and various automations in Linux and Windows environments.
- Practiced TDD methodologies, CI/CD framework, and Agile/DevOps methodologies, utilizing automation tools like Selenium, Robot Framework, and Karate Framework.
- Conducted performance testing using Apache JMeter and custom Python scripts to validate system behavior under load.
- Explored and integrated GenAI capabilities to enhance automation beyond traditional database-related tech stacks.

Test Engineer

Jan 2014 - Jan 2017, May 2021 - Sep 2022 — career break Jan 2017 - Apr 2021

Trueblue, Accenture

- Performed UI, backend, and database testing using automation tools: Selenium, Robot Framework, Karate Framework.
- Developed monitoring dashboard using BigQuery and Looker. Utilized SAP HANA for reporting and testing purposes.
- Developed and executed test plans and test cases to ensure comprehensive test coverage.
- Collaborated with development teams to identify and resolve software defects, improving overall product quality.

EDUCATION

- **B.Tech, Information Technology** — JNTUK, Kakinada (7.2 CGPA, 2013)

COURSES

- Program Management (LinkedIn)
- Agentic AI (Coursera)
- AI in Program Management (LinkedIn)

AWARDS

- HCLTech - Excellence Award (2024)
